

Welcome to InfiniCLOUD

InfiniCLOUD is a cloud storage service that lets you back up your important files, photos, videos, and other kinds of data – all in one place.

Because InfiniCLOUD uses an open protocol and can be accessed from any location, your data will still be available even if you misplace your phone or your computer breaks.

With your smartphone, tablet, or desktop computer, data can be uploaded or downloaded using the web browser or one of the many [third-party applications](#) that are compatible with InfiniCLOUD.

Back up your essential and important data to prevent losing it.

- **01 Upload files to your InfiniCLOUD**
https://infini-cloud.net/en/support_guide_filebrowser.html
- **02 Share your files and folders**
https://infini-cloud.net/en/support_guide_webbrowser_sharing.html
- **03 Using InfiniCLOUD with third-party applications**
<https://infini-cloud.net/en/clients.html>

[Login to InfiniCLOUD](#) to get started.

If you have any questions, please see [Online Support](#).
